**DR. MERTHEL EVARDOME**  
Schools Division Superintendent  
Division of City Schools-Antipolo City

Dear Dr. Evardome,

The Technological Institute of the Philippines is committed to promote Information and Communication Technology (ICT) proficiencies among high school students of Pasig City. The TIPQC through its Extension Services Program, Admissions and Marketing Office, and Electronics Engineering Department plan to conduct a training workshop on **LabView**, which will be held on **Saturday, March 7, 2015**.

LabVIEW is a programming environment in which you create programs using a graphical notation. Unlike the traditional text-based programming languages, like C, C++, Java, or MATLAB, you program in LabVIEW graphically, that is functions are represented as nodes with inputs and outputs, and are wired through which data flows.

In this regard, we are inviting fifty (50) students who are interested to join from each of the following High Schools of the Division of Antipolo. The actual training will last for eight (8) hours. The Training will start at 8AM and will finish at 5PM. Certificates of Participation will be given to all the participants after the training. TIP will also provide lunch for the participants and the accompanying teachers.

**Name of Schools**
